| <b>DESCRIPTION / FEATURES</b> | <p>Zintra curved sticks add a sense of depth and dynamism to flat surfaces. It's not easy to achieve this without the headache and huge cost associated with structural changes. When combined the Aluminium tube and the unique curved installation rib allows you to use a single set of sticks to create a simple curve, or, if you want your project to make waves, combine multiple sets and design a dramatic ceiling or wall swell.</p> <p>Available in Narrow or Wide widths</p> |
