DESCRIPTION / FEATURES	The modular design is available in a range of configurations and come with connectors that let you tailor them to individual spaces.
	They're lightweight and come in a range of 24-colors, and realistic wood prints that give you the choice of creating anything from progressive ceiling features to exposed architectural beams.
	Available in 5 standard formats and designed with customisation in mind beams are easily configured for larger spaces.
	Beams have been specifically designed to offer superior acoustics by acting as a porous sound absorber across the full frequency range. If you are looking for added acoustic value, co-ordinated Coffer panels are available as an accessory to increase NRC rating up to 1.5
HOW TO SPECIFY	1. Select PET Color
	2. Select Size
